PUSH
THE LIMIT
OF COMFORT!

EXCLUSIVELY AT

www.streamspas.com/en

YOUR STREAM WILL NOT ONLY FEEL GOOD, BUT IT WILL ALSO LOOK GOOD.

The **STREAM** is a new generation spa.

It's roominess exudes unparalleled comfort. It's 100% accessibility exudes peace of mind and above all, it's extremely affordable. The **STREAM** was engineered to combine comfort and roominess. It was designed with multiple seating options for massage variety and to accommodate different body shapes and sizes. It also has an oversized footwell for added leg comfort. The lounge is unique in that it can be used by a single person or with a second person relaxing at the other end. The lounge chairs are extremely roomy, as well, and two are equipped with armrests for added seating comfort. The **STREAM** also has two cool down seats that provide a break from your massage or simply, a chance to cool down a bit without having to exit the spa.

The **STREAM** is equipped with a 4-way diverter valve to enable a variety of massage options. You can direct the water through all the jets for a gentle, relaxing massage. If desired, you can divert the water through one half of the spa jets or through the other half of the spa jets to increase your intensity.

And if you need to address a specific part of your body with dynamic force, you can direct all of the water through a single, turbo jet. Whatever your body desires, the **STREAM** can deliver.

The **STREAM** is manufactured as a 120V "Plug & Play" spa. You can simply set it in place**, fill it with water and plug it into a standard, dedicated 120V electrical outlet. And if you enjoy using your spa for long periods of time in cold weather, it can also be converted to 240V* for better heating efficiency.

The **STREAM** was designed with a contemporary look that you will be proud to display in your backyard. It has the ambiance of an LED backlit, cascading waterfall which is enhanced by external LED sconce lighting in each corner of the spa.
